

YOUR CALENDAR. A LITTLE LESS CHASING.

Turn a cancellation into a welcome.

Keep your appointments in Square.

Let Juniper manage who gets the next offer—and what happens after that.

Today, the waitlist sheet and separate text conversations make it hard to see who is considering an opening and when to move on.

The goal: refill at least half of last-minute cancellations, with fewer manual follow-ups and no competing confirmations.

LET'S WALK THROUGH ONE OPENING

A haircut with Jessica.

3:00 pm

45 minutes become available.

You check and reserve the time in Square.

Maya Chen

First eligible request

Olivia Brooks

Next eligible request

Maya gets an offer → her time runs out →
Olivia gets the next offer → the opening is filled.

01 · THE FIRST INVITATION

Maya gets the first chance.

3:00 pm haircut · Jessica · 45 minutes | Earliest eligible request first

SIMULATED TEXT · NO SMS SENT

Hi Maya, a haircut with Jessica opened up at 3:00 PM today. It's yours if you'd like it. Please respond by 2:00 PM using your offer link.

DEMO · 20-second response window

Next in line		Earliest eligible request first
01	Olivia Brooks	Ready if needed
02	Nora Patel	Ready if needed

You can see the plan.

The right match

Service, stylist preference, duration, and full availability must fit.

A clear deadline

Maya has the only active offer for this opening. Her countdown is visible.

A next step already lined up

Olivia is ready if Maya declines or does not respond.

02 · MAYA DOES NOT RESPOND

Time runs out. Olivia’s offer starts automatically.

No staff click is needed to move the opening to the next eligible client.

20 SECONDS LATER · THE SAME OPENING, A NEW OFFER

SIMULATED TEXT · NO SMS SENT

Hi Olivia, a haircut with Jessica opened up at 3:00 PM today. It's yours if you'd like it. Please respond by 2:00 PM using your offer link.

DEMO · 20-second response window

YOUR HISTORY RECORDS BOTH STEPS

The story so far

Offer sent to Olivia Brooks. Simulated text is ready.

2:00 PM

Maya Chen's offer expired without a response.

2:00 PM

Offer sent to Maya Chen. Simulated text is ready.

2:00 PM

Staff confirmed the time is reserved in Square. Outreach started.

2:00 PM

MAYA’S OLD LINK NOW SHOWS A CLOSED INVITATION

THIS INVITATION HAS CLOSED

Another opportunity will come.

The offer moved. The explanation stayed.
You can return to the page and see who has the opening and why.

03 · OLIVIA SAYS YES

Olivia accepts. The opening is filled.

Outreach stops, Olivia's request leaves the waitlist, and the remaining staff action is visible.

YOUR STAFF VIEW · ACCEPTED, WITH A SQUARE REMINDER

A CHAIR FILLED. A DAY MADE.

**Olivia Brooks**
Accepted at 2:00 PM

Square update pending

The client has accepted. Add this appointment to Square and adjust any existing booking.

I've updated Square ✓

No competing acceptance

The expired link was rejected. Only the current offer could fill this opening.

A useful record

A shared history records the timeout, next offer, and acceptance.

OLIVIA'S PHONE VIEW

SOMETHING TO LOOK FORWARD TO

It's yours, Olivia.

Your appointment has been accepted. We look forward to seeing you.

Tuesday, October 6

3:00 PM

Haircut · 45 minutes
with Jessica

The salon is still updating its calendar. Staff will also handle any changes to your previous appointment.

TRY IT TOGETHER, THEN DECIDE

Let's put the process through your kind of day.

A 30-minute walkthrough with you and Carla, using fictional clients.

Ready to try

- Matching and one offer at a time.
- Automatic timeouts and progression.
- Phone-friendly accept / decline and closed expired links.
- A shared history and Square update reminder.

For this prototype

- Texts are simulated; no SMS is sent.
- The 20-second window speeds up the demo.
- You reserve and update Square manually.
- No Sheet import, schedule replacement, or staff push alerts.

What we'll try

- Let one offer expire and watch the next begin.
- Try an old link after the handoff.
- Accept the current offer, then finish the Square step.
- Review the history without retracing text conversations.

Then prepare a small,
supervised pilot.

Add real messaging, staff sign-in, and hosting first. Then track openings filled, booking conflicts, and staff follow-up time.

Pilot target: at least 50% of cancellations refilled with less checking. These are goals to measure, not results claimed from the demo.
